

In the claims:

For the Examiner's convenience all pending claims are presented herein. Those claims that remain unchanged by this amendment are prefixed with "(Unchanged)". Please amend the claims as follows:

1 (Twice Amended) A method for managing entertainment system data,
2 comprising:
3 obtaining a record corresponding to a first entertainment selection [that is
4 selected];
5 presenting a first set of entertainment system data in the obtained record
6 corresponding to the first entertainment selection on a display device;
7 presenting a selectable identifier corresponding to the [a] first set of
8 entertainment system data [in the obtained record on a] on the display device; [and]
9 performing a search for a second entertainment selection having a
10 corresponding second set of entertainment system data related to the first set of
11 entertainment system data when the selectable identifier is selected; and
12 presenting a result of the search on the display device.

1 2. (Unchanged) The method of Claim 1, wherein obtaining the record
2 comprises referencing an entertainment selection identifier of the first entertainment
3 selection in a database.

1 3. (Unchanged) The method of Claim 1, wherein presenting the selectable
2 identifier comprises generating an identifier that is distinguishable from non-selectable
3 text.

1 4. (Unchanged) The method of Claim 1, wherein performing the search
2 comprises searching a database for the entertainment system data related to the first set of
3 entertainment system data.

1 5. (Unchanged) The method of Claim 1, wherein presenting the result of the
2 search comprises displaying the result of the search in a synopsis box on the display
3 device.

Sub C3
6. (Amended) A computer-readable medium having stored thereon a
2 sequence of instructions, the sequence of instructions including instructions which, when
3 executed by a processor, causes the processor to perform operations comprising [the steps
4 of]:

5 obtaining a record corresponding to a first entertainment selection [that is
6 selected];

7 presenting a first set of entertainment system data in the obtained record
8 corresponding to the first entertainment selection on a display device;

9 presenting a selectable identifier corresponding to the [a] first set of
10 entertainment system data [in the obtained record on a] on the display device; [and]

11 performing a search for a second entertainment selection having a
12 corresponding second set of entertainment system data related to the first set of
13 entertainment system data when the selectable identifier is selected; and

14 presenting a result of the search on the display device.

1 7. (Unchanged) The computer-readable medium of Claim 6, wherein
2 obtaining the record comprises referencing an entertainment selection identifier of the
3 first entertainment selection in a database.

1 8. (Unchanged) The computer-readable medium of Claim 6, wherein
2 presenting the selectable identifier comprises generating an identifier that is
3 distinguishable from non-selectable text.

1 9. (Unchanged) The computer-readable medium of Claim 6, wherein
2 performing the search comprises searching a database for entertainment system data
3 related to the first set of entertainment system data.

1 10. (Unchanged) The computer-readable medium of Claim 6, wherein
2 presenting the result of the search comprises displaying the result of the search in a
3 synopsis box on the display device.

Sub C5
B3
11. (Amended) A system control agent, comprising:
2 a data parser that formats entertainment system data into an identifier
3 portion and a data portion;
4 a data engine, coupled to the data parser, that stores the entertainment
5 system data into a database according to corresponding entertainment selections; and
6 a query interface, coupled to the database, that configures a graphical user
7 interface (GUI) having an identifier corresponding to a first set of entertainment system
8 data of a first entertainment selection, the identifier being [is] selectable to display a
9 second entertainment selection having a corresponding second set of entertainment
10 system data related to the first set of entertainment system data.

1 12. (Unchanged) The system control agent of Claim 11, wherein the query
2 interface comprises:
3 a user interface unit that receives an identity of the identifier selected;
4 a database interface unit, coupled to the user interface, that searches the
5 database for the second entertainment selection having the corresponding second set of
6 entertainment system data related to the first set of entertainment system data; and
7 a synopsis box building unit, coupled to the database interface unit, that
8 displays the identity of the second entertainment selection on a display device.

1 13. (Amended) A computer system, comprising:
2 a bus;
3 a processor coupled to the bus;
4 a system control agent, coupled to the bus, that includes a data parser that
5 formats entertainment system data into an [a] identifier portion and a data portion, a data
6 engine that stores the entertainment system data into a database according to
7 corresponding entertainment selections, a query interface that configures a graphical user
8 interface (GUI) having an identifier corresponding to a first set of entertainment system
9 data of a first entertainment selection, the identifier being [is] selectable to display a
10 second entertainment selection having a corresponding second set of entertainment
11 system data related to the first set of entertainment system data.

1 14. (Unchanged) The computer system of Claim 13, wherein the query
2 interface comprises:
3 a user interface unit that receives an identity of the identifier selected;
4 a database interface unit, coupled to the user interface, that searches the
5 database for the second entertainment selection having the corresponding second set of
6 entertainment system data related to the first set of entertainment system data; and

7 a synopsis box building unit, coupled to the database interface unit, that
8 displays the identity of the second entertainment selection on a display device.

1 15. (Amended) A graphical user interface (GUI), comprising:

2 a first set of entertainment system data corresponding to a first
3 entertainment system selection;

4 an identifier corresponding to the [a] first set of entertainment system data
5 of the [a] first entertainment selection, the identifier being [that is] selectable to generate
6 a synopsis box that displays a second set of entertainment system data of a second
7 entertainment selection, the [with a] second set of entertainment system data being
8 related to the first set of entertainment system data.

1 16. (Unchanged) The method of Claim 1, wherein performing the search
2 comprises performing a search of records of entertainment system data received from a
3 plurality of different sources.

1 17. (Unchanged) The method of Claim 1, wherein the entertainment selections
2 are selected from the group comprising programs, music selections, software
3 applications, files, and Internet broadcasts.

1 18. (Unchanged) The method of Claim 1, wherein performing the search
2 comprises performing a search in accordance with instructions stored with the first set of
3 entertainment system data to find other entertainment selections.

1 19. (Unchanged) The method of Claim 1, wherein the second set of
2 entertainment data is related to the first set of entertainment data in that an item of data
3 corresponding to the same trait is the same in both sets of data.

1 20. (Unchanged) The computer-readable medium of Claim 6, wherein
2 performing the search comprises performing a search of records of entertainment system
3 data received from a plurality of different sources.

1 21. (Unchanged) The computer-readable medium of Claim 6, wherein the
2 entertainment selections are selected from the group comprising programs, music
3 selections, software applications, files, and Internet broadcasts.

1 22. (Unchanged) The computer-readable medium of Claim 6, wherein
2 performing the search comprises performing a search in accordance with instructions
3 stored with the first set of entertainment system data to find other entertainment
4 selections.

1 23. (Unchanged) The computer-readable medium of Claim 6, wherein the
2 second set of entertainment data is related to the first set of entertainment data in that an
3 item of data corresponding to the same trait is the same in both sets of data.

1 24. (Unchanged) The system control agent of Claim 11, wherein the
2 entertainment system data is received from a plurality of different sources.

1 25. (Unchanged) The system control agent of Claim 12, wherein the database
2 interface unit searches the database in accordance with instructions that it retrieves from
3 storage with the first set of entertainment system data.

1 26. (Unchanged) The GUI of Claim 15, further comprising non-selectable text
2 corresponding to entertainment system data of the first entertainment selection.

1 27. (Unchanged) The GUI of Claim 26, wherein the selectable identifier is
2 presented so that it is distinguishable from non-selectable text.
